Descargas

The screenshot shows the footer of the Mendeley website. It is divided into three columns. The first column is titled 'Get Mendeley' and contains links for 'Mendeley for your desktop', 'Mendeley for Microsoft Word', 'Mendeley for your browser', 'Pricing', and 'Datasets'. The second column is titled 'Support' and contains links for 'Guides', 'Support Center', 'Release Notes', 'Developers', and 'Responsibility Sharing'. The third column is titled 'About Us' and contains links for 'Blog', 'Advisor Community', 'Accessibility Statement', and 'AI Statement'. Each column has a 'Read more' link at the top. Three large red arrows point downwards from the 'Read more' links to the 'Get Mendeley', 'Support', and 'About Us' sections respectively. At the bottom of the page, there is a copyright notice, a cookie consent message, and the RELX logo.

Referencia manual

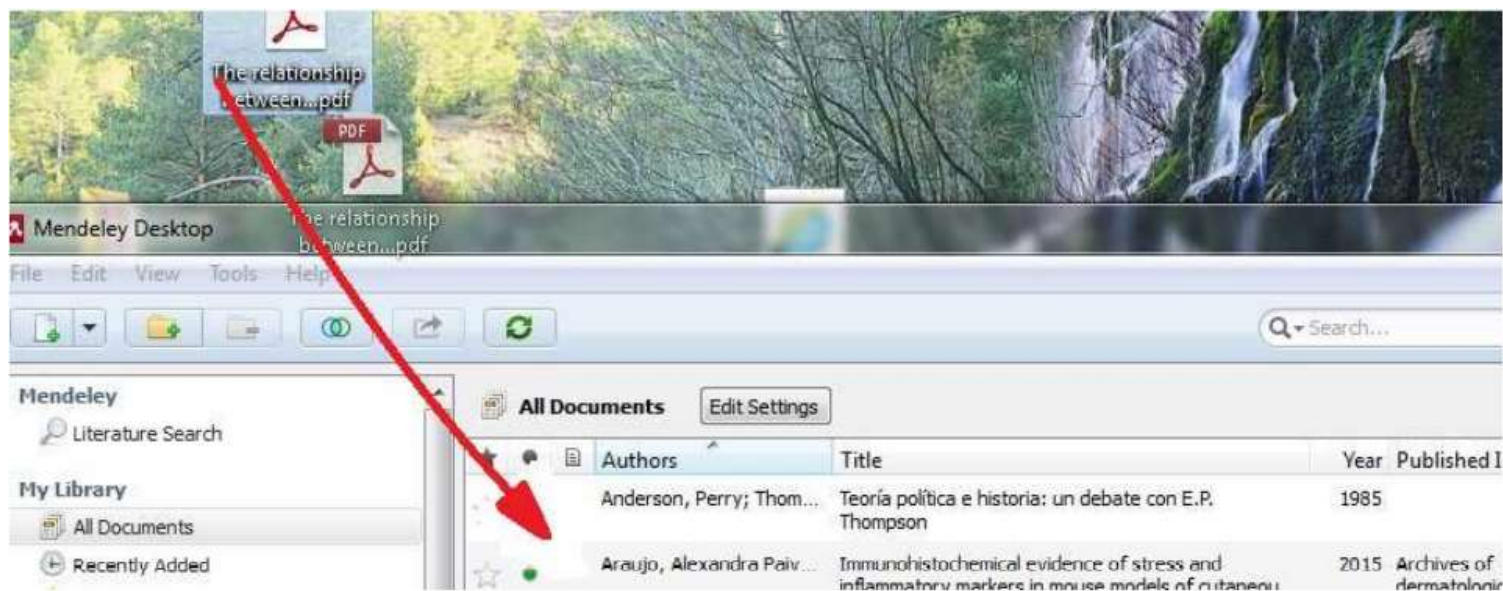

The screenshot displays the BUMA library interface. On the left, a sidebar contains a '+ Add new' button, which is highlighted with a red box. A red arrow points from this button to a dropdown menu. In the dropdown menu, the 'Add entry manually' option is also highlighted with a red box, and a red arrow points from it to the 'Add entry manually' dialog box. The dialog box has a title 'Add entry manually' and a search input field for 'Identifiers (ArXivID, DOI or PMID)'. Below this is a 'Reference type' dropdown menu with 'Journal Article' selected. At the bottom of the dialog is a 'Title' input field. The background shows a list of publications with columns for 'TITLE' and 'A new e'.

TITLE	EXPERIMENT / STUDY	GOAL	MATERIALS	METHODS	RESULTS	CONCLUSION
Knowledge management in the business using Mendeley	Case study	To describe the use of the Mendeley reference management tool in the teaching of Research Methodology and Scientific Methodology offered in the distance education modality in undergraduate courses at the Universidade do Contestado, Brazil.	Mendeley reference management tool, Bard's content analysis technique	1. Provided basic instruction on Mendeley to students. 2. Guided students to apply the Mendeley tool using Bard's content analysis technique.	The content analysis method combined with the Mendeley technology can help students present better literature reviews, especially for final graduation projects such as course completion monographs.	The use of the Mendeley reference management tool and Bard's content analysis technique can improve students' ability to conduct literature reviews and write better final graduation projects.
Literature review as a research methodology: An overview and guidelines	Literature review methodology overview	To provide an overview of and guidelines for different types of literature reviews as a research method in business research.	Research articles, books, and other published texts on literature review methodologies	Synthesize and integrate guidelines from existing literature on different types of literature reviews, including systematic, semi-systematic, and integrative approaches.	The paper separates between different types of review methodologies and argues that depending on purpose and quality of execution, each type can be effective. It also addresses practical issues encountered when conducting literature reviews in business research and provides guidelines for assessing quality when evaluating review papers.	The potential for making theoretical and practical contributions using the literature review as a method will be advanced by clarifying what a literature review is, how it can be used, and what criteria should be used to evaluate its quality.
Normalization of Mendeley reader impact on the reader-side paper-side. A comparison of the mean discipline normalized reader score (MNRNS) with the mean normalized reader score (MNRNS) and bare reader counts.	Theoretical and empirical analysis of a new indicator for normalizing Mendeley reader counts	To introduce the mean discipline normalized reader score (MNRNS) as an adaptation of the citing-side normalization to reader-side data from Mendeley, and to compare it with the mean normalized reader score (MNRNS) and bare reader	Articles and reviews from the Web of Science core collection with publication year 2012 and a DOI, Mendeley reader counts and discipline information for these papers	1. Calculated the average number of Mendeley readers per paper for each Mendeley discipline. 2. Normalized the Mendeley reader counts of each paper by dividing the raw reader count by the average reader count in the	1. Normalization of Mendeley reader counts as necessary, as bare reader counts show large disciplinary biases. 2. The MNRNS is able to normalize reader counts in some disciplines, but has issues in others like social	The MNRNS should be preferred over the MNRNS for normalizing Mendeley reader counts, as it performs better at field-normalization. However, if an external field-classification scheme is not available, the MNRNS can

Compare Experiments provides an overview of experiments and studies typically found within research documents. The overview includes methods, results, conclusions and more, per experiment, for every selected paper.

Understanding and treating arm movement impairment after chronic brain injury: progress with the ARM guide., ...

Library | Notebook

2 / 12

Manual therapy techniques could enhance recovery by a number of not clearly understood. For example, active assist therapy could maintain improve muscle strength, or encourage cortical reorganization by providing facilitation methods could also enhance strength and reduce unhelpful coupling between movements of adjacent joints.

We have recently developed a rehabilitator, "the ARM Guide" (Assis order to study these issues (references 7,8: **Figure 1**). Our primary objective provide an improved diagnostic therapeutic tool for exploring reviews current progress

epitaxy, processing, and the devices to which these advances have led. Theoretical work detailing the high-frequency and high-power performance of SiC and other wide-band-gap semiconductors is also described. Section III examines GaN along with its AlN and InN alloys, covering advances in epitaxial techniques, doping and device technology. ZnSe is reviewed in Sec. IV, with a primary focus on *p*-type doping with activated nitrogen and the design and fabrication of lasers.

II. SiC

SiC was one of the first semiconductors discovered and its large cohesive energy caused some to mistake it for an element. Its high electron saturation velocity, wide band gap, and high thermal conductivity, among other properties, make it highly attractive for high-temperature and high-power applications. Despite its indirect band gap, SiC blue LEDs are commercially available. Below, we describe the material properties, crystal growth, doping, oxidation, etching, ohmic contacts, and device technology of SiC.

A. SiC for high-power, high-temperature electronics

An appreciation of the potential of SiC for electronic applications can be gained by examining Table I which compares the relevant material properties of SiC and GaN with Si and GaAs, the two most popular semiconductor device technologies, and GaP and diamond, two other contenders for high-temperature applications. Most notable are the large thermal conductivities, breakdown voltages, and saturation velocities of SiC, GaN, and diamond. The device maximum operating temperature parameter is calculated as the temperature at which the intrinsic carrier concentration equals $5 \times 10^{15} \text{ cm}^{-3}$ and is intended as a rough estimate of the

Large cohesive energy

“To get insights regarding the structure of the corona magnetic field we have to compute 3D magnetic field models, which use the measured photospheric magnetic field as the boundary condition. This procedure is often called “extrapolation of the coronal magnetic field from the photosphere”

“SiC was one of the first semiconductors discovered and its large cohesive energy caused some to mistake it for an element.

“In cooperation with IFCI (Institut de Formation et Conseil en Informatique, Grenoble), another system, BEX-FEX, has been developed for teaching purposes (B. Roudaud, S. Chappuy, and E. Guilbaud). The analysis is a simplified version of the IN1 analysis (see below), and the dictionaries are purposely very small (500 lexical units

Creación de grupos

The screenshot displays a web interface for managing library groups. On the left, a sidebar lists various groups, with 'Grupo creado' highlighted and a context menu open over it. The context menu includes options: 'Manage Group', 'Rename Group', 'Delete Group', and 'New Collection'. The main area shows a table of groups with columns for status, actions, author, year, and title.

Compartir anotaciones en documentos

The screenshot shows a document viewer interface. At the top, there is a navigation bar with "Library" and "Notebook" tabs. Below this is a document title bar: "[Shared] The relationship between police and private security: Models and future directions, Sarre R, Prenzler T. ...". A toolbar below the title bar includes a share icon (circled in red), a pencil icon, a comment icon, a yellow highlighter icon, and a page indicator "1 / 23". The document content is displayed below, with a vertical watermark on the left: "loaded by [UMA University of Malaga] at 04:32 07". A large section of text is highlighted in yellow. A red circle highlights a comment icon in the top right corner of the highlighted text. A red arrow points from this comment icon to the share icon in the toolbar. Below the highlighted text, the section "Introduction" is visible, starting with the text: "The trend towards privatization of modern policing is now firmly entrenched. Typically, this has *not* occurred in terms of the common meaning of the word 'privatization' through the sale of government services. Rather

Complemento Mendeley Cite

The screenshot shows the footer of the Mendeley website. It is divided into three main columns, each with a 'Read more' link above it. The first column, 'Get Mendeley', lists links for desktop, Microsoft Word, browser, pricing, and datasets. The second column, 'Support', lists guides, support center, release notes, developers, and responsibility sharing. The third column, 'About Us', lists a blog, advisor community, accessibility statement, and AI statement. At the bottom, there is a copyright notice, terms of use, privacy policy, a cookie consent message, and the RELX logo.

Cite as you write. Generate citations and bibliograph

Mendeley Cite speeds up the process of referencing when writing references from their Mendeley library directly into their Microsoft Word.

The Mendeley Cite add-in for Word, which can be used without a Mendeley desktop application, allows you to insert individual or multiple references and auto insert them.
