¿Qué es un lector de contenidos?

- Un lector o recopilador de contenidos es un programa o página web que recopila las publicaciones recientes de webs o blogs para leerlos de manera centralizada (ver fundeu.es/escribireninternet/lector-de-contenidos)
- Las fuentes web o (*web feeds*) permiten transmitir a través de internet información sobre los cambios en los contenidos de un sitio web. Suscribiéndose a las fuentes web se estará al corriente de las novedades y cambios que se producen.
- Las fuentes web son documentos XML. Los formatos más habituales son RSS y Atom (ver juntadeandalucia.es/informacion/fuentesweb.html)

. Un écran tactile pour explorer les vitraux de l'Abbaye de Conques au Musée Soulages (14/03/2016)

Le visiteur peut contempler virtuellement et sous toutes les coutures les fameux vitraux de l'abbaye de Conques. Grâce à un important écran tactile, il peut désormais admirer en haute définition plusieurs vues de l'édifice et de ses vitraux. Et même s'y «déplacer» au gré de ses envies. Une «time lapse» (montage vidéo présentant des photos prises toutes les 20 secondes pendant 24 heures), permet également d'admirer en accéléré la lumière changeante qui traverse les vitraux.

Archivar y Clasificar con etiquetas

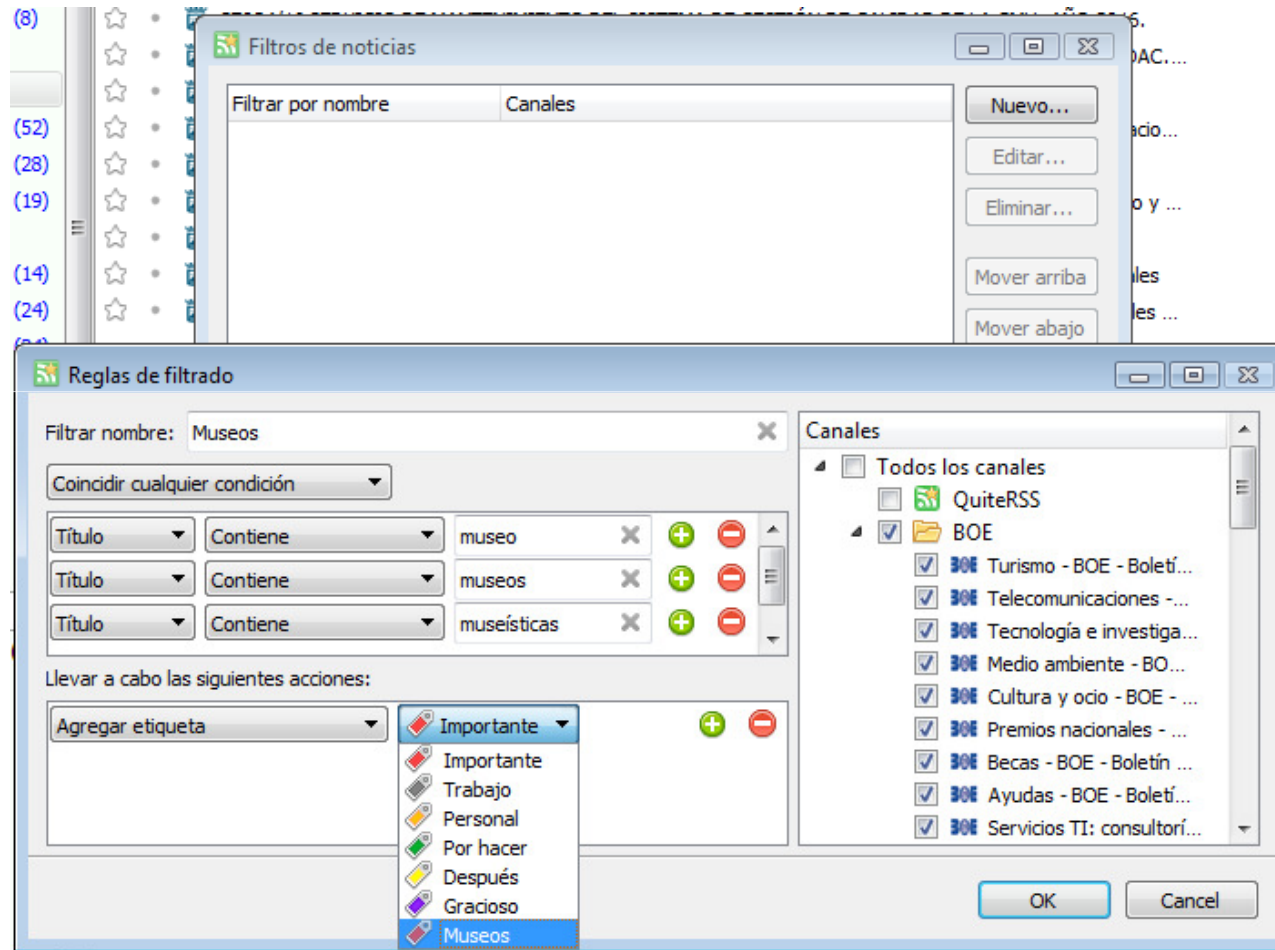

Filtrar automáticamente los contenidos

Hemos visto cómo clasificar los artículos recibidos con las etiquetas. La clasificación puede hacerse automáticamente, durante la recepción de los elementos, mediante el filtrado mediante palabras clave. La calidad del filtrado automático dependerá de la relevancia de las palabras clave elegidas . Este método es efectivo para controlar nombres de empresas, marcas comerciales , nombres de personalidad , etc.
