- Tassegdalte Cultural Association.
- Meskis Association

Objectives

- Cultural Exchange
- Language learning
- Early Stimulation
- Physical Rehabilitation
- Basic Activities of Daily Living

O. T. Intervention in the Orphanage

BABIES (15 days-3 years) Cradle Sing lullabies. Rotations Postural changes. Movements. Basic ADLs	Children 4-9 years old Interactive games. proprioceptive stimulation. Basic ADLs
---	--

Routines

Acquire competence

- To apply the knowledge in practice
 - Teamwork
 - Adjustment
 - To value the diversity and the multiculturalism
 - Learning about another customs and culture
 - Interpersonal skills
 - The ability to work in an international context
- Transversal competences: O.T. white book

Numbers:

- Community**
 - 60 % minor girls
 - 40% minor boys
- Volunteer work**
 - 20 people approximately every fortnight
 - 6 coordinators
- Orphanage**
 - 16 minors (8 girls, 8 boys) (6 with difficulties)

Summary

Taznaqt, a community to be developed" Has been a project of International Cooperation by the University of Málaga where 4 students who were in their 4th course of occupational therapy participated. From the 8th of July until the 8th of September in the southeastern region of Morocco known as Taznaqt located near the city of Errachidia. We have collaborated and lived the experience with the Amal Taznaqt entity, an organization that works with the volunteers since 2013. In our case, we have dedicated ourself to both organizing and carry out activities and classes for the kids from Taznaqt during the month of July, and were able to volunteer work as occupational therapists in the towns orphanage "la maison de les enfants" during the month of August, carrying out an early stimulation and a physical rehabilitation on the kids that were staying there. The experience in both places has helped us develop in a personal and a professional way, learning how to work as a team, how to apply the knowledge and how to work in an international context.
